Next generation CNC technology for economical, fast and precise manufacturing

Setting global standards with its CNC products, Mitsubishi Electric provides industrialists with flexible and efficient manufacturing

One of the leading brands in electrics, electronics and automation sectors, Mitsubishi Electric sets standards in many sectors around the world, mainly being automotive and metal working with its next generation CNC products. Stating that they are providing advanced technology solutions in order to contribute to advancing manufacturing quality of Turkey even further during Industry 4.0 phase, Mitsubishi Electric Turkey Factory Automation Systems Mechatronics CNC Department Senior Manager Hakan Aydın also emphasized that they pay great attention to post-sales services. Saying that they provide new series of products such as M80 and M800 series CNC control units for more economical, faster and more precise manufacturing, Aydın said they provide manufacturers with added value in CNC processing centers and CNC lathe machines.

One of world's biggest brands in the fields of electrics, electronics and automation with its reliable and high quality products, Mitsubishi Electric provides added value to factories in terms of rapid integration, productivity, flexibility and efficiency. Providing leading machine manufacturers with CNC products and solutions, Mitsubishi Electric manages to enable more economical, faster and more precise manufacturing. Stating that they are providing advanced technology solutions in order to contribute to advancing manufacturing quality of Turkey even further during Industry 4.0 phase, **Mitsubishi Electric Turkey**

Factory Automation Systems Mechatronics CNC Department Senior Manager Hakan Aydın informed us about their studies aimed towards Turkish machinery industry.

Turkish machinery industry will grow stronger during Industry 4.0 era

Stating that Turkey is higher on the list compared to numerous European countries in terms of population density, young work force and work quality, Hakan Aydın said; "One of the driving lines of work of our country, the machinery industry will grow stronger during Industry 4.0 era. We, as Mitsubishi Electric, strive to help Turkish industry adapt to rapidly increasing competition conditions with advanced technology innovative products, quality service and spare parts services, project design studies designed with our engineering knowledge and know-how as well as post-sales services which we pay great attention to."

Also challenging at post-sales services

Stating that Mitsubishi Electric sets the standards in the world in numerous industries with its CNC products incorporated with advanced technology, mainly being automotive and metal working industry. Aydın finished his words saying; "As Mitsubishi Electric Turkey Factory Automation Systems Mechatronics CNC Department, we can gather our studies in Turkey under two main titles. First, providing CNC machines incorporated with Mitsubishi Electric CNC products imported from overseas with service and spare parts. Second is providing CNC machines manufactured by machinery manufacturers operating within Turkey with necessary Mitsubishi Electric hardware, conducting project-design studies and implementation. Mainly being Taiwan, over a thousand Mitsubishi Electric controlled machinery is imported to Turkey from numerous countries every year. Post-sales services is a topic we pay great attention to. We aim to provide our customers with problem-free service with competent and experienced teams and plan our studies accordingly."

More economical, faster and more precise manufacturing

Stating that new generation products they provide to industry professionals with features such as optical communication, high speed and high precision processing, high front buffer capacity, data server functions provided as standard make manufacturing processes much more efficient, Hakan Aydın finished his words saying; "CNC users choose our new generation products for their more economical, faster and more precise manufacturing goals. We strive to increase the added value it presents to manufacturers with CNC processing centers and CNC lathe machines. Included in the

product range in this prospect, M80 and M800 series CNC control units are constantly being improved."

About Mitsubishi Electric Corporation

With over 95 years of experience in providing reliable, high-quality products, Mitsubishi Electric Corporation is a recognized world leader in the manufacture, marketing and sales of electrical and electronic equipment used in information processing and communications, space development and satellite communications, consumer electronics, industrial technology, energy, transportation and building equipment. Embracing the spirit of its corporate statement, Changes for the Better, and its environmental statement, Eco Changes, Mitsubishi Electric endeavors to be a global, leading green company, enriching society with technology. The company recorded consolidated group sales of 4,444.4 billion yen (in accordance with IFRS; US\$ 41.9 billion) in the fiscal year ended March 31, 2018.
