**Elevators and escalators with high comfort and customer satisfaction**

## **MITSUBISHI ELECTRIC TAKES PART IN 'MAKRO' PROJECTS**

**Makro İnşaat, a leading construction company, opts for Mitsubishi Electric elevators and escalator systems for high safety, quality, comfort, and technology leading to high customer satisfaction.**

As a company that prioritizes customer satisfaction and safety in its projects, Makro İnşaat preferred Mitsubishi Electric's elevators and escalators for Park Maveria, an outstanding project comprised of 8 blocks on a total land of 53 thousand sqm under the joint venture of Makro İnşaat & Akyapı in 2015 as one of the most outstanding construction projects of the year. Makro İnşaat also contracted Mitsubishi Electric for elevator and escalator systems of Maveria Başakşehir, Bahçetepe İstanbul, 540/4 Parsel Ticari, Giriş Kayaşehir and Maveria Sarayları projects prior to Park Maveria.

Makro İnşaat has procured 141 elevators ranging from 630 to 1,000 kg as well as 34 escalators between 4,750 mm and 5,600 mm and 2 moving walkways of 4,500mm from Mitsubishi Electric until now.

### **Safe, fast, eco-friendly**

Mitsubishi Electric is recognized for the upscale projects it undertakes in Turkey and the rest of the world as it is capable of manufacturing and assembling elevators the world's fastest elevators with 18 meters per second thanks to its outstanding safety, comfort, performance and high technology. Distinguished with its product, service and maintenance quality, travel comfort and high technology, Mitsubishi Electric adds value to Makro İnşaat projects.

### **Energy efficiency and travel comfort**

The elevators used for Makro İnşaat projects are exceptionally eco-friendly thanks to the permanent magnetic gearless traction machine and door machines which reduce power consumption significantly and they are distinguished with a number of advantages such as travel comfort and low noise (below 45 db) in addition to not requiring lubrication operations. All the elevator cars are equipped with LED lights and the car lighting/ventilation fan is turned off automatically if there are no calls for a specified period in order to contribute to high energy efficiency.

The elevators are able to stop at the nearest floor to evict the passengers in case of power cuts or earthquakes and evict the passengers by eliminating the risk of getting stuck halfway between two floors by means of the secondary back-up system which shall be activated in case of the breakdown of the control board. Recognized for the high safety precautions and low breakdown rates, Mitsubishi Electric elevators do not require modernization for 20 to 25 years on average thanks to their high technology which leads to significant cost savings for investors like Makro İnşaat.

### **24/7 support services...**

ETA-MELCO, the exclusive distributor of Mitsubishi Electric elevators and escalators in Turkey, offers services from the beginning till the completion of the projects with a professional team comprised of engineers and technicians experienced in design, installation/assembly, maintenance and all other technical matters. Recognized for its service quality and speed, ETA-MELCO is also distinguished with the support services provided on 24/7 basis which are easily accessible at any time when necessary.
