

Mitsubishi Electric Enters into Agreement to Acquire Majority Interest in DeLclima

8/26/2015

Mitsubishi Electric Corporation (TOKYO: 6503) ("Mitsubishi Electric") has entered into an agreement to purchase from Industrial S.A. ("De'Longhi Industrial") shares representing approximately 74.97% of the share capital of DeLclima S.p ("DeLclima"), an Italian company engaged in the commercial air conditioning products business. After the closing of the mandatory tender offer will be launched by Mitsubishi Electric in order to acquire the remaining shares representing approximately 25.03% of the share capital of DeLclima, in compliance with Italian financial law and CONSOB regulations. The total price for 100% of DeLclima's shares is approximately €664 million (calculated based on a per-share price of €4.44).

The completion of the transaction in relation to the acquisition by Mitsubishi Electric of 74.97% of DeLclima's share capital ("Transaction") requires clearance from antitrust authorities and the completion of the sale of DL Radiators S.r.l., an indirect subsidiary of DeLclima ("DL Radiators"). DL Radiators will be sold to a company affiliated with De'Longhi Industrial prior to the closing of the Transaction. In addition, under the agreement the €4.44 per-share price will be increased by an additional amount on a daily basis, starting from 30 June, 2015 up to the closing date. The estimated per-share amount of such price increase is €0.07, assuming that the closing of the Transaction will take place at the end of November 2015.

Mitsubishi Electric is currently assessing the impact of this acquisition on its finances and will promptly make an announcement there arises any necessity to update its financial forecast or to disclose any information.

Reasons for the Acquisition

Mitsubishi Electric has a global presence in the area of heating, ventilation and air conditioning (HVAC) systems in Japan, Europe, North America, China, Southeast Asia, India and Australia, and MITSUBISHI ELECTRIC CORPORATE RELATIONS DIVISION 7-3, Marunouchi 2-chome, Chiyoda-ku, Tokyo, 100-8310 Japan. Mitsubishi Electric in particular is an important player in the European air conditioning market. As the European air conditioning market matures, it further requires market players to provide value-added products such as energy-saving products and to comply with environmental regulations (F-Gas regulation response, Mitsubishi Electric has grown its business in the region with a particular focus on room and packaged air conditioning as well as multi air conditioning for buildings. The acquisition of DeLclima represents Mitsubishi Electric's full-scale entry into the European air conditioning business and will enable the company to expand its business portfolio, which will be important in achieving continuous increasing market presence. Moreover, the acquisition will allow Mitsubishi Electric to adequately respond to environmental (F-Gas regulations), which are expected to become even more important in the coming years.

DeLclima's subsidiaries include Climaveneta S.p.A. and RC Group S.p.A., and their strengths are the following:

Climaveneta S.p.A.:

- Leading market share in Europe and strong brand supported by customer trust and high quality in the chillers business - Energy-saving and low-noise technology, and superior development / design and efficient production capabilities that customization and quick delivery; and
- System-solution capabilities, such as remote monitoring of HVAC equipment.

RC Group S.p.A.:

- Expertise in specialized air conditioning, such as air conditioning for server rooms, a major business of RC Group S.p.A.

Demand for chillers is expected to remain strong in Europe, which is of high strategic importance for Mitsubishi Electric business. Acquiring DeLclima will allow Mitsubishi Electric to enhance its product lineup for large commercial machine chillers, and to become a comprehensive provider of HVAC systems ranging from residential to commercial. Mitsubishi Electric will increase its competitiveness and enlarge its business by enhancing its solution-type business with DeLclima's system-capabilities and by realizing synergies, such as by strengthening the company's global presence with DeLclima's existing presence in various countries, including China.

Mitsubishi Electric expects to leverage its newfound synergies in the following way:

- Increasing sales by pursuing cross-selling opportunities for both companies;
- Integrating the companies' control systems to strengthen HVAC solution capabilities; and
- Adding more value to DeLclima's products by utilizing the components manufactured by Mitsubishi Electric, such as exchangers, fans and compressors.

*1 Regulations in Europe require the total emissions for Freon gas, a type of greenhouse gas, to be reduced gradually

*2 Chillers maintain the temperature of an object by utilizing a heat medium (e.g., water) in a loop system and as a gen central air conditioning systems whose primary application is for large facilities such as buildings and factories.
