Mitsubishi Electric Listed on CDP's "A List" for Climate Change and Water Security for the 6th Time

Mitsubishi Electric has been included in the highest category, the "A List," of the Climate Change and Water Security lists published by CDP, an international non-profit organization that supports environmental disclosure. Since 2016, the company has been selected for the A List a total of six times across these categories.

Mitsubishi Electric Corporation announced that it has been included in the "A List" of CDP, which is recognized by the global economy as the gold standard for environmental reporting, in both the Climate Change and Water Security categories. CDP's Climate and Water rankings reflect Mitsubishi Electric's strong environmental focus in its business activities and targets.

Positioning sustainability as a cornerstone of its management philosophy and its Environmental Sustainability Vision 2050, Mitsubishi Electric aims to achieve net-zero greenhouse gas emissions at its factories and offices by the fiscal year ending March 31, 2031, and across its entire value chain by the fiscal year ending March 31, 2051.

A New Step Toward Sustainability and Environmental Goals: Mitsubishi Electric Environmental Plan 2025

Mitsubishi Electric Corporation also announced its new *Environmental Plan 2025*, which aims to contribute to the realization of a sustainable global environment through global value chains. Effective from April 2024 to March 2026, the plan is based on the company's long-term environmental commitments outlined in its *Environmental Sustainability Vision 2050* and focuses on addressing long-term environmental challenges. The company also shared its updated greenhouse gas emission reduction targets for all Mitsubishi Electric Group companies, which have been approved by the Science Based Targets initiative (SBTi). These targets are aligned with the Paris Agreement's 1.5°C pathway for 2030.

Mitsubishi Electric aims to achieve *Nature Positive* outcomes by enhancing its capacity to achieve carbon neutrality, promote a circular economy, and halt and reverse nature loss. To achieve *Nature Positive*, the company commits to contributing to global sustainability by consistently implementing environmental initiatives, including reducing environmental impacts across its entire value chain.
