

## **Mitsubishi Electric Türkiye to Highlight Advanced Process Automation Solutions at “Proses Otomasyon Çözümleri Zirvesi”**

**Mitsubishi Electric Türkiye Factory Automation Systems will showcase its advanced process automation solutions at the Proses Otomasyon Çözümleri Zirvesi, taking place on April 14–16, 2026, at Makina Hangar Mühendislik ve Teknoloji Merkezi.**

Bringing together the latest automation technologies in the process industry, the summit will take place in Istanbul this year between April 14–16, 2026, at Makina Hangar Mühendislik ve Teknoloji Merkezi. Positioned as a gold sponsor at the summit, Mitsubishi Electric Türkiye Factory Automation Systems will introduce its process automation approach focused on efficiency, safety, and operational continuity in manufacturing to industry professionals. Visitors will have the opportunity to closely explore Mitsubishi Electric’s products and systems, ranging from advanced inverter technologies and GOT3000 human-machine interfaces to ICONICS software solutions and high-performance MELSEC iQ-R PLC systems.

On the second day of the summit, Project, Vertical Channel and Surrounding Countries Section Manager Nezahat Uzer will participate in the panel titled “Process Automation Solutions in Energy, Power Generation, Geothermal and Biogas Industries.” During the session, she will share insights on Mitsubishi Electric’s engineering expertise in process automation, the latest industry technologies, and real-world application experiences from the field.

Throughout the three-day event, Mitsubishi Electric aims to engage with industry stakeholders and demonstrate how advanced automation technologies can support smarter and more sustainable industrial operations.
