

Mitsubishi Electric Türkiye to Participate in the FIA-TECH Manisa 2026 Summit with Its Automation and Digitalization Solutions

Mitsubishi Electric Türkiye will participate in the FIA-TECH Manisa 2026 Future Automation Technologies Symposium and Exhibition, taking place on June 25–26 in Manisa, where it will present its advanced factory automation solutions to industry professionals.

Committed to delivering innovative automation solutions that create value for businesses, Mitsubishi Electric Türkiye Factory Automation Systems will showcase its latest technologies at FIA-TECH Manisa 2026. During the two-day event, the company will introduce its innovative solutions for factory automation systems, digital manufacturing technologies, and Industry 4.0 applications, while engaging with technology professionals and industry representatives.

The symposium will feature nine panel sessions focusing on the latest industry developments and future trends. As part of the event, Mitsubishi Electric Türkiye will share its expertise in digital transformation with participants. Gözde Güçyeter, Inverter & LVS Product Consultant at Mitsubishi Electric Türkiye Factory Automation Systems, will deliver a presentation titled "Mitsubishi Electric Inverter Solutions," highlighting the role of inverter technologies in manufacturing processes, their contribution to energy efficiency, and Mitsubishi Electric's comprehensive solution portfolio in this field.

Throughout FIA-TECH Manisa 2026 Automation Fair, Mitsubishi Electric Türkiye will welcome visitors to its booth to explore its latest automation and digitalization solutions. Participants will have the opportunity to discover the company's technologies designed to enhance manufacturing efficiency and support digital transformation initiatives. Mitsubishi Electric Türkiye invites all visitors to Booth D-100 to learn more about the technologies shaping the future of manufacturing.
